MOHAMMED RIZWAN

AI/ML Engineer | Machine Learning | Generative AI (RAG/LLM) | Python
+91 9550000219 | mdrmohammedrizwan@gmail.com
LinkedIn | GitHub | HackerRank

PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience developing Generative AI and Machine Learning applications using Python, LLMs, RAG, LangChain, FAISS, and Hugging Face. Experienced in building end-to-end RAG pipelines, semantic search, and LLM integrations. Developed LLM-powered AI applications with multi-document processing, source citations, and Streamlit interfaces. Strong foundation in Generative AI, AI application development, Machine Learning, and cloud technologies.

TECHNICAL SKILLS

Programming Languages	Python, SQL
Generative AI	LLMs, Retrieval-Augmented Generation (RAG), Prompt Engineering, Semantic Search, Groq, LLM APIs
RAG	RAG Pipelines, Document Processing, Text Chunking, Embeddings, Context Retrieval, Grounded Generation, Source Citations
AI/LLM Framework	LangChain, Hugging Face Sentence Transformers
Vector Databases	FAISS
Machine Learning	Supervised Learning, Unsupervised Learning, Classification, Regression, Feature Engineering, Model Evaluation, Scikit-learn
Data & Analytics	EDA, Data Cleaning, ETL, Data Modeling, Pandas, NumPy
Visualization	Power BI, Tableau, Microsoft Excel, Matplotlib, Seaborn
Database	MySQL
Cloud & Tools	AWS, Git, GitHub, CI/CD pipelines, Streamlit, VS Code, Jupyter Notebook, MySQL Workbench

PROFESSIONAL EXPERIENCE

AI/ML Engineer Intern, Datavalley Dec 2025 - Present

- Processed 20,000+ records using Pandas and NumPy, reducing missing values by 30% before model training.
- Built classification models using Logistic Regression and Random Forest achieving 85% validation accuracy while improving prediction consistency.
- Developed and evaluated 15+ zero-shot, few-shot, and chain-of-thought prompt templates to improve structured information extraction from unstructured data.
- Evaluated model performance using Accuracy, Precision, Recall, and F1-score, achieving a 15% improvement in F1-score through feature engineering and model optimization.
- Automated Python-based ML workflows integrated with LLM APIs and automated reporting pipelines, reduced manual effort by 40%.
- Collaborated with 4-member cross-functional teams in an Agile environment to deliver AI-driven solutions for real-world business use cases.

Content Compliance Analyst, Wipro Nov 2024 - Oct 2025

- Reviewed and validated 200+ Google Ads daily while maintaining 98% policy compliance accuracy and consistently meeting SLA requirements.
- Analyzed ad creatives and advertiser cases to identify policy violations and operational issues, using Excel reports to track performance trends and productivity metrics.

- Resolved advertiser issues through direct handling and timely escalation workflows, ensuring smooth operations and policy adherence.
- Monitored productivity metrics and adapted to evolving policy workflows, achieved 99% QA score and exceeding turnaround targets by 15%.
- Delivered data-driven insights that supported process optimization initiatives, reducing recurring operational issues by 22% and contributing to improved team efficiency.
- Consistently met 100% monthly performance KPIs across a high-volume data review environment, demonstrating sustained operational accuracy.

KEY PROJECTS

RAG-Powered PDF Question Answering System

Tech Stack: Python, LangChain, FAISS, Hugging Face Sentence Transformers, Groq(OpenAI GPT-OSS 20B), Streamlit, Git, GitHub

- Engineered an end-to-end Retrieval-Augmented Generation (RAG) pipeline for multi-document PDF question answering, using document chunking, Hugging Face embeddings, FAISS vector search, and semantic similarity retrieval.
- Integrated Groq-hosted OpenAI GPT-OSS 20B with LangChain to generate grounded, context-aware responses from retrieved document content, reducing unsupported/hallucinated answers.
- Built an interactive Streamlit application supporting multi-PDF uploads, conversational chat history, source retrieval, and real-time response generation.
- Implemented source and page-level citations to improve answer traceability and retrieval grounding.

AI-Smart Attendance Tracking System

Tech Stack: Python, OpenCV, Streamlit, SQLite, Pandas, NumPy, Git, GitHub

- Engineered an AI-powered attendance platform using OpenCV, SQLite, and Streamlit capable of recognizing faces with over 95% accuracy across 100+ registered users.
- Integrated LLM APIs to automatically generate attendance summaries and analytics reports, reducing manual reporting effort by 90%.
- Created interactive dashboards (Teacher, Student, Admin) supporting 100+ registered users with CSV export for reporting and analysis.
- Resolved deployment and dependency issues across multiple cloud environments, improving application stability and deployment reliability.

EDUCATION

B.Tech - Computer Science and Engineering 2019 - 2023

KL University (KL Deemed to be University), Hyderabad | CGPA: 8.3

Intermediate 2017 - 2019

Narayana Junior College, Telangana Board | CGPA: 8.0

CERTIFICATIONS

- Aviatrix Certified Engineer - Multi-Cloud Networking Associate
- Deloitte Data Analytics Virtual Experience (Forage)
- Accenture Data Analytics and Visualization Job Simulation (Forage)
- Data Analytics - Kapil IT Skill Hub
